SUMMARY

A passionate and detail-oriented Data Science student with hands-on experience in building machine learning models and AI-powered applications. Proficient in **Python**, **SQL**, and **ML frameworks** with a strong foundation in **data preprocessing** and **feature engineering**.

Experienced in developing user-centric, data-driven solutions and leveraging full-stack skills (MERN) to create interactive applications for data products. A quick learner, adaptable, and driven by innovation in collaborative tech environments

EDUCATION

Master of Computer Application

09/2023 – 05/2025

M. Kumaraswamy College of Engineering

B.Sc. in Computer Science

03/2020 – 05/2023

Sri Paramakalayani College Alwarkurichi

SKILLS

Data Preprocessing

JavaScript

MongoDB

React

REST-API

SQL

Tailwind

ML

Python

GIT

LLM

RAG

Langchain

Feature Engineering

CERTIFICATION

Udemey React

React - The Complete Guide 2025 (incl. Next.js, Redux) [🔗](#)

Oracle Certificate

Oracle certificate foundations associate

Hacker Rank Certification

Hacker Rank - SQL (Advance)

PROJECTS

1. AI-Powered Document Chatbot using LangChain (RAG)

06/2025 – 08/2025

- Built a RAG-based chatbot with **LangChain**, **ChromaDB**, and **TinyLlama** for interactive Q&A on uploaded PDFs.
- Utilized vector embeddings and semantic search for relevant chunk retrieval.
- Integrated TinyLlama for context-aware, accurate responses and leveraged ChromaDB for efficient similarity search.
- Designed a Streamlit UI for real-time PDF upload and chat, applying LangChain for structured querying

2. CafeRevenue Tracker (Click here for Live) [🔗](#)

08/2025 – 09/2025

- Built a Machine Learning model (Linear Regression + SelectKBest) to predict daily coffee shop revenue.
- Engineered time-based features (Day of Year, Week, Quarter) and performed scaling & preprocessing
- Developed a modern Streamlit app with interactive input cards and animated revenue display. Evaluated model performance using metrics such as **R2** , **RMSE**, **MAE**, and **MAPE**.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Streamlit, Joblib.

3. Medify

07/2024 – 11/2024

- Developed a role-based hospital management web application using the **MERN stack**.
- Streamlined operations like appointment booking, bed allocation, feedback, and real-time chat.
- **Customer Page Link:** <https://hoszi.netlify.app> [🔗](#) .

IDE Tools

Visual Studio

Pycharm

Jupyter NoteBook

Databases

SQL
